## PROFILE

---

International Information Systems student with a keen eye for detail and a passion for software quality. Experienced in validating complex relational data (at Malengo) and testing modern web applications (React 19). Looking to apply my structured work style and technical understanding to manual software testing.

## PROFESSIONAL EXPERIENCE

---

### Working Student (Data Quality & Program Support), Malengo gGmbH

12/2025 – Present

Remote

- Data Validation: Manage and validate comprehensive tracking sheets and dashboards for the Kenya TVET scholar program, covering cohorts 2024B, 2025A, and 2025B.
- Consistency Checks: Conduct daily verification between attendance logs, vaccination records, and status reports to identify and resolve discrepancies
- Process Documentation: Structure and maintain operational data files to ensure 100% data integrity for reporting

### Volunteer Blogger, Study in Germany (DAAD)

03/2025 – Present

Remote

Content QA: Write, verify accuracy and clarity of information for the international audience.

### Sortation Associate, Amazon

06/2025 – 11/2025

Gersthofen,  
Germany

- Process Adherence: Executed digital workflows following strict safety and quality standard operating procedures.
- Efficiency: Maintained high accuracy rates in a fast paced, target driven environment.

## Projects

---

### StartGermany/Survival Kit, React 19, Vercel, Github

- Modern Web Testing: Built and tested a responsive guide platform, manually verified stability during a major upgrade to React 19.
- QA Workflow Automation: Configured ESLint to automatically detect syntax errors and improve code quality before deployment.
- UI & Logic Verification: Manually tested dynamic components, such as guide counters and tag filters, to ensure real-time data accuracy.
- AI-Assisted Workflow: Utilized AI tools for initial scaffolding while focusing on manual verification and debugging of the generated logic.

## **Lyia Braids** ☽ , Service Website (*Client Project*)

- UX Optimization: Designed a mobile-first interface and implemented a direct-to-WhatsApp booking integration to minimize user friction.
- Cross-Browser Testing: Verified layout consistency across Chrome, Safari, and mobile views to ensure a professional user experience.
- Privacy Compliance: Integrated and tested GDPR-compliant cookie consent banners.

## **SKILLS**

---

### **Testing & QA**

Manual Testing, Bug Reporting, Data Validation, UI/UX Verification

### **Tech Stack**

Java (Basic to intermediate), SQL(Basic), React/Web(Basic to Intermediate), Git/Github

### **Tools**

VS Code, MS Office, AI-Assisted Workflows(ChatGPT/Copilot)

### **Languages**

Luganda - Native  
English - C1  
German - A2 (Actively Learning)

## **EDUCATION**

---

### **B.Sc. International Information Systems, Technische Hochschule Augsburg**

10/2025 – Present  
Augsburg, Germany

- Focus: IT Systems, Backend Logic, Data Processes
